

Formed by 24+ Non-Profits, Community Development Orgs,
Universities, Corporations, & Local Government Agencies

Problem Statement

Atlanta ranks 4th in the nation in median energy burden levels and 3rd among low-income household populations. Most of the owner-occupied homes in Westside Atlanta are over 70 years old and suffer from energy burdens, equity theft, and extensive deferred maintenance.

Our Approach

Phase 1

The Coalition will offer workforce training in deconstruction and sustainability skills. Additionally, initial weatherization improvements will be performed in the neighborhoods.

Phase 2

The Coalition will provide more extensive home repairs and improvements, including energy efficiency retrofits and using recycled materials from Lifecycle Building Center.

Phase 3

The Coalition will implement community-based solar initiatives to reduce energy burdens, lower homeowners' energy costs, and reduce reliance on costly, and more pollutive, non-sustainable sources of energy.

Core Values

- Advancing Equitable Community Development
- History and Assets of Westside Communities
- Intergenerational Learning and Teaching
- Anti-Racist Approach
